Subject: We are preparing the initial letter to submit for the Nov wildfire event

We have consulted with the State of Tennessee, and we are going to submit a request for exceptional event status for November 8 (470654002), November 11(470650031), November 14(4002 - Void on 0031), and November 17 (4002 and 0031). We recognize that our data is so low (design value <9 for 2014-2016 with the data included) that the event ruling may never be needed, but we are hesitant to wait until later for submittal since this is such a well-documented event. We have changed our flag status for these dates in AQS to "rt" from the informational "IT" flags. I trust this e-mail is sufficient to give preliminary notice to EPA to expect our initial letter in the next few days and our demonstration by July 1.
